

DMS 2010: Globalization and Personalization

The Sixteenth International Conference on Distributed Multimedia Systems

www.ksi.edu/seke/dms10.html

Hyatt Lodge at McDonald's Campus, Oak Brook, Illinois, USA
October 14 - October 16, 2010

Organized by
Knowledge Systems Institute, USA, University of Florence, Italy, University of Leeds. UK

Call for papers

The DMS conference is an international conference series, which covers a wide spectrum of paper presentations, technical discussions and demonstrations in the fields of distributed multimedia computing. The theme for DMS2010 is Globalization and Personalization. The conference organizers seek contributions of high quality papers, panels or tutorials, addressing various aspects of distributed multimedia systems and applications, for presentation at the conference and publication in the proceedings. Both research and case study papers or demonstrators describing results in research area as well as industrial development cases and experiences are solicited. Demonstrators prototypes are welcome to support the submission and to be presented at the conference in the discussion sections.

Special issue of journals

The DMS conference is closely coordinated with the International Journal of Software Engineering and Knowledge Engineering, the Journal of Visual Languages and Computing and the International Journal of Distance Education Technologies. Usually the best ranked papers from the conference, after rigorous reviews, extensive revisions and further enhancements, will appear in one or more special issues of the above journals. Papers suggested for the special issue(s) will be reviewed by external reviewers following the standard procedure of review stipulated by the respective journal.
